

You can connect up to 32' of standard (30/m) or 16' high output (60/m) flex strip end to end. If you have longer runs it's best to connect like pictured below (run a wire from the power supply/dimmer to each 32' or 16' section)

The 4A/Ch DMX Decoder (pictured) can control up to 4x reels of standard output 150 led/reel strips

USLED SUPPLY.COM

The 6A/Ch DMX Decoder can control up to 6x reels of standard output 150 led/reel strips but you should still run additional feed wires every 2 reels for best results
