1. BEFORE YOU BEGIN

What is Included

- Intimidator™ Wash Zoom 350 IRC
- Power Cord
- Thread Reducing Adapter
- Warranty Card
- Quick Reference Guide

Unpacking Instructions

Carefully unpack the product immediately and check that all the parts are in the package and are in good condition.

Claims

If the box or any of the contents appear damaged from shipping, or show signs of mishandling, save all packaging and file a claim with the carrier immediately, do not notify CHAUVET®. Failure to report damage to the carrier immediately or failure to have all packaging available for inspection may invalidate your claim.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with CHAUVET® within 7 days of delivery. For information on contacting CHAUVET®, see the [Contact Us](#) section of this manual.

Text Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values
Settings	A menu option
Menu > Settings	A sequence of menu options
<ENTER>	A button to be pressed
ON	A value to be entered or selected

Symbols

Symbol	Meaning
	Critical installation, configuration, or operation information. Not following these instructions can make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product might not function correctly if this information is not used.
	Useful information.

Safety Notes

These notes include important information about the mounting, use, and maintenance of this product. Read these notes before using the product.

- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Make sure the power cord is not crimped or damaged.
- Always disconnect the product from the power source before cleaning it or replacing the fuse.
- Never disconnect the product from the power source by pulling or tugging on the cord.
- If mounting the product overhead, always secure it using a safety cable.
- Make sure there are no flammable materials close to the product when it is operating.
- Avoid direct eye exposure to the light source while the product is on.
- Do not touch the product's housing when the product is operating because the housing can be very hot.

- This product is not intended for permanent installation.
- The product is for indoor use only! It is rated at IP20.
- To prevent risk of fire or shock, do not expose the product to rain or moisture.
- Always make sure that the voltage of the power source to which the product is connected is within the range stated on the sticker or rear panel of the product.
- Never connect the product to a dimmer or rheostat.
- Make sure to replace the fuse with another of the same type and rating.
- Always install the product in a location with adequate ventilation, and leave at least 20 in (50 cm) between the product and adjacent surfaces.
- Always use the handles to carry this product.
- The maximum ambient temperature (Ta) in which the product can be used is 104 °F (40 °C). Do not operate the product at higher temperatures.
- Be sure that no ventilation slots on the product's housing are blocked.
- Never carry the product by the power cord or any moving part.
- In the event of a serious operating problem, stop using the product immediately.
- Never try to repair the product. Repairs carried out by unskilled people can lead to damage or malfunction. Contact the nearest authorized technical assistance center.

- Keep this User Manual for future reference. If you sell the product to another user, be sure to give this manual to the next owner.

2. INTRODUCTION

Overview

Dimensions

3. SETUP

AC Power The Intimidator™ Wash Zoom 350 IRC has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz.

To determine the product's power requirements (circuit breaker, power outlet, and wiring), use the values listed on the label affixed to the product's back panel, or refer to the product's Specifications. The listed current rating indicates the product's average current draw under normal conditions.

The Intimidator™ Wash Zoom 350 IRC can be power linked via the IEC and Edison outlets in its base.

Always connect the product to a protected circuit (circuit breaker or fuse). Make sure circuit has an appropriate electrical ground to avoid the risk of electrocution or fire.

Never connect the product to a rheostat (variable resistor) or dimmer, even if the rheostat or dimmer serves only as a 0 to 100% switch.

Fuse Replacement

Make sure product is not connected to a power source.

1. Place the tip of a flat-head screwdriver into the slot in the fuse holder.
2. Turn the screwdriver counterclockwise and the fuse holder will come loose.
3. Pull the fuse holder out of the product.
4. Pull the blown fuse out of the fuse holder.
5. Place a new fuse of the exact same type and rating into the fuse holder.
6. Insert the fuse holder into the product.
7. Place the tip of a flat-head screwdriver into the slot in the fuse holder.
8. Turn the screwdriver clockwise and the fuse holder will tighten into place.

Disconnect the product from power before replacing the fuse.

Use only the fuse listed in the Technical Specifications section or on the specifications sticker on the product.

A spare fuse is not included.

Power Linking The product provides power linking via the Edison/IEC outlet located in the back of the unit.

**Power Linking
Diagram**

Up to 5 Intimidator™ Wash Zoom 350 IRC units can be linked on 120 V, or up to 12 Intimidator™ Wash Zoom 350 IRC units on 230 V.

The power linking diagram shown above corresponds to the North American version of the product ONLY!

If using this product anywhere other than North America, consult with the local CHAUVET® distributor because power linking connectors and requirements differ from country to country, and region to region.

Mounting

Before mounting the product, read and follow the safety recommendations in the [Safety Notes](#) section.

Orientation

The Intimidator™ Wash Zoom 350 IRC can be mounted in any position, but make sure the placement allows adequate ventilation for the product, and allows for movement of the yoke and head in any direction.

Rigging

Be sure to place the product in a location that allows easy access to it for maintenance and programming, and enough space around the product for ventilation.

Make sure that the structure or surface onto which the product will be mounted can support the product's weight. For more information see the [Technical Specifications](#) section.

When mounting the product overhead, always use a safety cable and make sure the product is attached securely.

When mounting the product on a truss or pipe, use a mounting clamp with the appropriate weight capacity. CHAUVET® has a full range of mounting clamps. See <http://www.chauvetlighting.com/cables-clamps-main.html> for the complete selection.

The rubber feet serve as floor supports. When placing the product on the floor, make sure that the product and cables are away from people and vehicles.

The included Thread Reducing Adaptor changes the built-in threaded mounting hole from M12 to M10 size. The smaller M10 size works with the CLP-10 clamp from CHAUVET®.

When using only one mounting clamp, be sure to use a clamp with a captive bolt to prevent accidental loosening.

Rigging Diagram

4. OPERATION

Control Panel Description

The control panel is used to set the operating mode, and the configuration settings of the product. Use the 4 buttons underneath the LCD display to access the control panel and navigate the menu map. For specific instructions see the Configurations sections below.

Button	Function
<MENU>	Enters into, or backs out of, the current menu option
<UP>	Scrolls up the list of options or selects a higher value
<DOWN>	Scrolls down the list of options or selects a lower value
<ENTER>	Activates a selected menu or value

Menu Map The Menu Map presents all the options in the menu system, and the values to set them.

Menu	Value		Description
Address	001–512		Sets the DMX starting address
Run Mode	DMX	14CH	Sets DMX personality
		29CH	
	Auto	Auto01— Auto16	Sets Auto mode
	Sound		Sets Sound mode
	Slave		Sets Slave mode
	IR		Sets infrared control
Setup	Pan Reverse	OFF	Normal pan operation
		ON	Reverse pan operation
	Tilt Reverse	OFF	Normal tilt operation
		ON	Reverse tilt operation
	Pan Angle	540	Sets the 540° pan angle range
		360	Sets the 360° pan angle range
		180	Sets the 180° pan angle range
	Tilt Angle	270	Sets the 270° tilt angle range
		180	Sets the 180° tilt angle range
		90	Sets the 90° tilt angle range
	P/T Speed	Normal	Sets the panning/tilting speed
		Fast	
		Slow	
	Fans	Auto	Sets fan speed to be triggered according to temperature
		Full	Sets fan speed to full
	Display	OFF	Display turns off after inactivity
		ON	Display stays on after inactivity
	Screen Rev	OFF	Normal display

Menu	Value		Description
Setup (Cont.)		ON	Upside-down display
	Dimmer Curve	Square	Sets the dimmer curve mode
		I Squa	
		SCurve	
		Linear	
	Dimmer Speed	Fast	Sets the dimmer speed
		Smooth	
	Color Balance	RED	Sets color balance for white (100–255)
		GREEN	
		BLUE	
		WHITE	
	Sensitivity	001—100	Sets sound sensitivity
Sys Info	Reset		Resets the product
	Factory Set		Loads factory defaults
	Ver Running Mode DMX Address Temperature		Shows the current software version, running mode, DMX address and product's temperature

Zone Control The Intimidator™ Wash Zoom 350 has 4 zones of control so that the light can emit different individual colors and patterns of light. The most flexibility over zone control is in the 29-channel DMX personality, which has direct color control of the zones.
Both the 29-channel and 14-channel DMX personalities have macros that use the zones.

Zone Control Drawing

Configuration (DMX)

To set the product in DMX mode for control with a DMX controller, do the following:

1. Make sure the product is plugged into a power source.
2. Connect the male end of a DMX cable to the DMX out socket of the DMX controller and the female end of the same cable to the DMX in socket on the product.
3. Set the DMX starting address and personality by following the directions below.

DMX Starting Address

When selecting a starting DMX address, always consider the number of DMX channels needed for the selected DMX personality. Choosing a starting address that is too high can restrict access to some of the product's channels.

The Intimidator™ Wash Zoom 350 IRC uses either 14 or 29 channels, depending on the personality. The highest configurable DMX address in 14-channel mode is **499**. The highest configurable DMX address in 29-channel mode is **484**.

For more information about DMX download the CHAUVET® DMX Primer from the CHAUVET® web site <http://www.chauvetlighting.com/download>.

To set the DMX starting address, do the following:

1. If the display shows a number from **001–512**, go to step 5.
2. Press **<MENU>** repeatedly until 4 icons show on the display.
3. Use **<UP>** or **<DOWN>** to highlight **Address**.
4. Press **<ENTER>** and a number from **001–512** will show on the display.
5. Use **<UP>** or **<DOWN>** to change the number to the desired DMX starting address.
6. Press **<ENTER>** to select the DMX starting address.

DMX Personalities

The Intimidator™ Wash Zoom 350 IRC has 2 DMX personalities: a 14-channel personality and a 29-channel personality.

To set the DMX personality, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
3. Press **<ENTER>** and the **Run Mode** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight **DMX**.
5. Press **<ENTER>**. A green dot will show on the **DMX** option line and the characters **14CH** or **29CH** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **14CH** and **29CH**.
7. Press **<ENTER>** to select the DMX personality shown.

After the DMX starting address and personality have been set, there will be a delay of 30 seconds before the display automatically returns to showing the current DMX address and the DMX personality.

If the display goes blank after 30 seconds, it is because the Display option is set to OFF. To set the Display option to ON go to Menu > Setup > Display and change the value to ON. For more information see the [Display ON/OFF](#).

DMX Channel Assignments and Values The following table outlines all the capabilities of the Intimidator™ Wash Zoom 350 and the channels that control them when the light is used with a lighting controller.

29-CH

Channel	Function	Value	Percent/Setting
1	Pan	000 ó 255	0 to 540°

Configuration (Standalone)

Use standalone configurations to operate the product without a DMX controller.

Never connect a product operating in a standalone mode (Sound, Auto, or IR) to a DMX chain that includes a DMX controller. Products in standalone mode can transmit DMX signals that interfere with the DMX signals from the controller

Sound Mode

Sound mode sets the product to respond to sounds and music.

To set the product to Sound mode, do the following:

1. Make sure the product is connected to a power source and not connected to a DMX controller.
2. Press **<MENU>** repeatedly until 4 icons show on the display.
3. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
4. Press **<ENTER>** and the **Run Mode** options will show on the display.
5. Use **<UP>** or **<DOWN>** to highlight the **Sound** option.
6. Press **<ENTER>**. A green dot will show on the **Sound** option line and the product will begin reacting to sound.

The product will respond only to low frequencies of music (bass and drums).

If the product is not responding to sound, increase the sensitivity. For more information see the [Sensitivity Setting](#) below.

Auto Mode

Auto mode sets the product to 1 of 16 preset movement patterns and color changes.

To set the product to Auto mode, do the following:

1. Make sure the product is connected to a power source and not connected to a DMX controller.
2. Press **<MENU>** repeatedly until 4 icons show on the display.
3. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
4. Press **<ENTER>** and the **Run Mode** options will show on the display.
5. Use **<UP>** or **<DOWN>** to highlight the **Auto** option.
6. Press **<ENTER>**. A green dot will show on the **Auto** option line, the current Auto mode will show up in green letters and the product will begin moving and emitting light.
7. Use **<UP>** or **<DOWN>** to cycle through the 16 Auto modes.
8. Press **<ENTER>>** to select one of the 16 Auto modes.

IR Mode IR mode allows the product to be controlled with an infrared remote controller. The IRC-6 can remotely set the product to various modes; adjust the color, speed and sensitivity; and set the strobe.

To set the product to IR mode, do the following:

Make sure the product is plugged into a power source and not connected to a DMX cable.

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
3. Press **<ENTER>**. The **Run Mode** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **IR** option.
5. Press **<ENTER>**. A green dot will show on the **IR** option line and the product will begin moving and emitting light.

IRC-6 Operation

The IRC-6 infrared controller (available from CHAUVET®) allows remote control of the Intimidator Wash Zoom 350 IRC.

Be sure the IRC-6 remote is pointing directly at the product and there is nothing in between the remote and the product.

Some of the buttons on the remote work differently than what is indicated on their labels. For example:

- **<MANUAL>** controls the white color in the LEDs.
- **<A>**, **<UV>**, and **<W>** control the Blackout function.

Please read the next section carefully.

The list below describes which features each button controls.

- **<BLACKOUT>** - Turns LEDs on and off.
- **<AUTO>** - Activates Auto mode. Use the **<+>** and **<->** buttons to cycle through Auto modes.
- **<SOUND>** - Activates Sound mode.
- **<STROBE>** - Activates the strobe. Use the **<+>** and **<->** buttons to cycle through strobe speeds.
- **<SPEED>** - Adjusts the movement speed. Use the **<+>** and **<->** buttons to cycle through movement speeds.
- **<SENSITIVITY>** - Adjusts sound sensitivity. Use the **<+>** and **<->** buttons to cycle through sound sensitivity levels.
- **<%>** - Adjusts the brightness of the LEDs. Use the **<+>** and **<->** buttons to increase or decrease the brightness of the LEDs.
- **<MANUAL>** - Adjusts the white color in the LEDs. Use the **<+>** and **<->** buttons to increase or decrease the white color in the LEDs.
- **<FADE/SNAP>** or **<FADE>** - Adjusts the speed and type of color fades. Press the button to switch between fade and snap color changes. Use **<+>** and **<->** to increase or decrease the speed of the color changes.
- **<R>** - Adjusts the red color in the LEDs. Use the **<+>** and **<->** buttons to increase or decrease the red color in the LEDs.
- **<G>** - Adjusts the green color in the LEDs. Use the **<+>** and **<->** buttons to increase or decrease the green color in the LEDs.
- **** - Adjusts the blue color in the LEDs. Use the **<+>** and **<->** buttons to increase or decrease the blue color in the LEDs.
- **<+>** - Increases values for controls as described above.
- **<->** - Decreases values for controls as described above.
- **<0>-<9>** - Activates specific Auto modes. Can be used as a shortcut for the combination of the **<AUTO>** button and the **<+>** and **<->** buttons.

Configuration (Master/Slave)

Master/Slave mode allows a single Intimidator™ Wash Zoom 350 IRC (the master) to control the actions of one or more Intimidator™ Wash Zoom 350 IRCs (the slaves) without a DMX controller.

In Master/Slave mode the master is set to operate in Auto mode, Sound mode, or IR mode and the slaves are set to operate in Slave mode.

The master and slaves are daisy chained through the DMX input and output ports with the master at the beginning of the chain. Once set and connected, the slaves will operate identically to, and in unison with, the master.

- **Always put the male DMX connector into the master. Do not connect to the DMX In port on the master.**
- **Never connect more than 31 slaves to the master.**
- **Never connect a DMX controller to a DMX daisy chain of master and slaves.**
- **Configure all the slaves** before connecting the master to the DMX daisy chain.

Configuring the Slaves

Configure the slaves for Slave mode before or after they are put in position, and before they are daisy chained to the master.

To configure a slave, do the following:

1. Make sure the product is connected to a power source.
2. Press **<MENU>** repeatedly until 4 icons show on the display.
3. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
4. Press **<ENTER>**. The **Run Mode** options will show on the display.
5. Use **<UP>** or **<DOWN>** to highlight the **Slave** option.
6. Press **<ENTER>**. A green dot will show on the **Slave** option line.

Configuring the Master

Configure the master after all the slaves are connected to it and configured.

To configure the master, do the following:

1. Make sure the product is connected to a power source and connected to all the slaves.
2. Press **<MENU>** repeatedly until 4 icons show on the display.
3. Use **<UP>** or **<DOWN>** to highlight the **Run Mode** icon.
4. Select any of the Standalone modes as described in [Configuration \(Standalone\)](#).

Configuration (Settings)

The Intimidator™ Wash Zoom 350 IRC can be customized with settings such as for movement, speed, display, and fan operation. Below are instructions for configuring all the settings available.

Pan Reverse

Reversing the pan movement is useful when 2 lights are facing each other and they both need to turn toward the same direction.

To reverse the pan movement do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Pan Reverse** option.
5. Press **<ENTER>**. The words **ON** or **OFF** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **ON** and **OFF**.
7. Press **<ENTER>** to select the setting.

Tilt Reverse

Reversing the tilt movement is useful when 2 lights are facing each other and they need to point towards the same space between them.

To reverse the tilt movement do the following: Press **<MENU>** repeatedly until 4 icons show on the display.

1. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
2. Press **<ENTER>**. The **Setup** options will show on the display.
3. Use **<UP>** or **<DOWN>** to highlight the **Tilt Reverse** option.
4. Press **<ENTER>**. The words **ON** or **OFF** will show in green.
5. Use **<UP>** or **<DOWN>** to switch between **ON** and **OFF**.
6. Press **<ENTER>** to select the setting.

Pan Range

Setting the pan angle range is useful when there is an area of the room that the Intimidator™ Wash Zoom 350 IRC should not illuminate.

To set the range of the pan movement, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use the **<UP>** and **<DOWN>** buttons to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use the **<UP>** and **<DOWN>** buttons to highlight the **Pan Angle** option.
5. Press **<ENTER>**. The three digits to the right will show in green.
6. Use **<UP>** or **<DOWN>** to select **180**, **360**, or **540**.
7. Press **<ENTER>** to select the setting.

Tilt Range

Setting the tilt angle range is useful when there is an area of the room that the Intimidator™ Wash Zoom 350 IRC should not illuminate.

To set the range of the tilt movement, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Tilt Angle** option.
5. Press **<ENTER>**. The three digits to the right will show in green.
6. Use **<UP>** or **<DOWN>** to select **90**, **180**, or **270**.
7. Press **<ENTER>** to select the setting.

Movement Speed The movement, or pan and tilt speed, can be adjusted and will affect the speed of the Auto and Sound modes.

To set the pan and tilt speed, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **P/T Speed** option.
5. Press **<ENTER>** and **Normal**, **Fast**, or **Slow** will show in green.
6. Use **<UP>** or **<DOWN>** to select the desired speed.
7. Press **<ENTER>** to select the setting.

Fan Operation The fans in the unit can be set to **Full** to remain on or set to **Auto** to run only when the product is hot enough to need a fan.

To set the fans to **Full** or **Auto**, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Fans** option.
5. Press **<ENTER>**. The words **Full** or **Auto** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **Full** and **Auto**.
7. Press **<ENTER>** to select the setting.

Display ON/OFF The display can be set to stay on permanently (**ON**), or to go off (**OFF**) when the menu is not being used.

If the display is set to **ON**, it will remain in any given menu for 30 seconds of inactivity, and then it will return to a home screen that shows the product's current mode and DMX address.

If the display is set to **OFF**, it will remain in any given menu for 30 seconds of inactivity, and then it will go blank and show nothing.

To set the display **ON** or **OFF**, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Display** option.
5. Press **<ENTER>**. The words **ON** or **OFF** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **ON** and **OFF**.
7. Press **<ENTER>** to select the setting.

If the display is set to **OFF**, it will come back on when the IRC-6 is used or when any menu button is pressed; however, it will not come on when it receives DMX control.

Display Orientation The display can show the screen in two directions, one for when the fixture is standing and one for when it is mounted upside-down.

To set the display orientation, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Screen Rev** option.
5. Press **<ENTER>**. The words **ON** or **OFF** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **ON** (upside-down display) and **OFF** (normal display).
7. Press **<ENTER>** to select the setting.

Dimming Curve The dimming curve can be adjusted to change how the light brightens and dims. If the factory default is not a suitable setting, and the dimming curve of this light needs to match more closely to that of another light, adjust this setting as follows.

To adjust the dimming curve, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Dimmer Curve** option.
5. Press **<ENTER>** and **Square**, **I Squa**, **SCurve**, or **Linear** will show in green.
6. Use **<UP>** or **<DOWN>** to select the desired option.
7. Press **<ENTER>** to select the setting.

Dimming Speed The dimming speed can be adjusted to change how quickly the light brightens and dims. If the factory default is not a suitable setting, and the dimming speed of this light needs to match more closely to that of another light, adjust this setting as follows.

To adjust the dimming speed, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Dimmer Speed** option.
5. Press **<ENTER>** and **Fast** or **Smooth** will show in green.
6. Use **<UP>** or **<DOWN>** to switch between **Fast** and **Smooth**.
7. Press **<ENTER>** to select the setting.

Color Balance The color balance setting is used to set the white color of the product. This setting affects only the color of the white light of the LED. The red, green, and blue colors will remain the same.

To adjust the color balance, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Color Balance** option.
5. Press **<ENTER>**. The product will begin emitting light and the **Color Balance** options will show on the display.
6. Use **<UP>** or **<DOWN>** to highlight the color to be adjusted.
7. Press **<ENTER>**. The number to the right will show in green.
8. Use **<UP>** or **<DOWN>** to select a value between **100** and **255**. The higher the number, the more of the color is included in the white setting.
9. Press **<ENTER>** to select the value setting.
10. Repeat steps 6 through 9 to adjust the remaining colors until the desired white color is emitted from the product.

Upon entering the color balance menu, the product will emit a white light. After exiting the color balancing menu, the product will return to the currently selected operations mode. If there is no activity for 30 seconds, the product will exit the color balance menu and return to the currently selected operations mode.

Sensitivity The sensitivity setting adjusts the sensitivity of the product's microphone. If the product is not responding to the beat of the music in Sound mode, set the sensitivity to a higher number until the product responds.

To adjust the sensitivity setting, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Sensitivity** option.
5. Press **<ENTER>**. The number to the right will show in green.
6. Use **<UP>** or **<DOWN>** to select a sensitivity level. The least sensitive is **1** and the most sensitive is **100**.
7. Press **<ENTER>** to select the setting.

Reset Resetting will restart the product. It does not change any settings. Resetting is a helpful troubleshooting tool, and can be used if the product has stopped responding to control, or if the control system has suffered a failure.

To reset the product, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Reset** option.
5. Press **<ENTER>**. The product will immediately reset.

Reset to Factory Defaults Resetting to factory defaults will clear out all customized settings and return thee settings to the factory defaults. Resetting to factory defaults can be used if the product is behaving inconsistently.

To reset the product to factory default settings, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Setup** icon.
3. Press **<ENTER>**. The **Setup** options will show on the display.
4. Use **<UP>** or **<DOWN>** to highlight the **Factory Set** option.
5. Press **<ENTER>**. The product will immediately reset to factory default settings.

System Information To see the product's current software version, running mode, DMX address and temperature, do the following:

1. Press **<MENU>** repeatedly until 4 icons show on the display.
2. Use **<UP>** or **<DOWN>** to highlight the **Sys Info** icon.
3. Press **<ENTER>**. The current information about the product will show on the display.

5. TECHNICAL INFORMATION

Product Maintenance

Dust build-up on the lens reduces light output. Dust build-up on the body and fans can cause overheating and mechanical wear, which can reduce the usable life of the product.

To maintain optimum performance and minimal wear in a normal environment, clean the product at least twice a month. If the environment is particularly dusty, clean the product more often.

For best results follow the suggestions listed below:

- Never clean the product when it is plugged into a power source.
- Only clean the product when it is at room temperature.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external surfaces and in the vents.
- Use a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol to clean all the external optics and glass or transparent surfaces.
- Apply the cleaning solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
- Gently wipe dirt and grime to the outside edges of the external optics and glass or transparent surfaces.
- Gently polish the external optics and glass or transparent surfaces until they are free of haze and lint.

Always dry the external optics and glass/transparent surfaces carefully after cleaning them.

Do not spin the cooling fans while blowing compressed air into them.

RETURNS

General Info To return a product or request support:

- In the U.S., contact CHAUVET® World Headquarters (see below).
- In the UK or Ireland, contact CHAUVET® Europe Ltd. (see below).
- In Mexico, contact CHAUVET® Mexico (see below).
- In any other country, DO NOT contact CHAUVET®. Contact your distributor. See www.chauvetlighting.com for distributors outside the U.S., United Kingdom, Ireland, or Mexico.

If you live outside the U.S., United Kingdom, Ireland, or Mexico, contact your distributor of record and follow their instructions on how to return CHAUVET® products to them. Visit our website for contact details.

U.S., UK, Ireland, and Mexico

Call the corresponding CHAUVET® Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the reason for the return.

You must send the merchandise prepaid, in its original box, and with its original packing and accessories. CHAUVET® will not issue call tags.

Clearly label the package with the RMA number. CHAUVET® will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

CHAUVET® reserves the right to use its own discretion to repair or replace returned product(s).
